

Designing for Digital Health: A CeHRes Roadmap Application for Care Coordination in the Philippines

AUGUSTUS CLARK RAPHAEL P. RODRIGUEZ, University of the Philippines Manila, Philippines

MARBERT JOHN C. MARASIGAN, University of the Philippines Manila, Philippines

CCS Concepts: • **Human-centered computing** → **User interface design**; • **Applied computing** → *Health informatics*.

Additional Key Words and Phrases: human-centered design, digital health, care coordination, CeHRes Roadmap, health information systems, Philippines

ACM Reference Format:

Temporary page!

L^AT_EX was unable to guess the total number of pages correctly. As there was some unprocessed data that should have been added to the final page this extra page has been added to receive it.

If you rerun the document (without altering it) this surplus page will go away, because L^AT_EX now knows how many pages to expect for this document.
